

## **SMALL ACTION BIG IMPACT**

SOLUTIONS TO HELP OUR WATERWAYS

### **SMARTER LAWN CARE**

Use fertilizer and pesticides carefully – too much runs off into stormwater, harming fish and ponds.

### **CLEAN UP PET WASTE**

Pet waste carries bacteria that washes into waterways. Always scoop it, bag it, and trash it..

### **POOL & SPA WATER**

Drain swimming pools responsibly – chlorine and salt can kill fish and plants.

### **PREVENT ILLEGAL DUMPING & TRASH**

Never pour oil, paint, or chemicals in storm drains – they flow straight to creeks and ponds.
